

5-6
Assistant Director for Operations

72-514
11 February 1952

Chief, FBID

Jackson's Report on OO/FBID

1. Page 13 Paragraph A. There is a strong likelihood that the recently approved Hokkaido operation will contribute to closing of the Central Asian gap in radio monitoring.

2. Page 14 Paragraph D. Mr. Wisner's comments here indicate that he will support a request for additional staff for analytic and collative work on radio propaganda of the Soviet orbit. As soon as the personnel ceilings have been established, FBID will attempt to determine whether the ceiling can be modified by a specific staff study indicating the strength of the requirement and justifying the need for more personnel. Meanwhile, limited expansion of the analytical operation will be accomplished through detailing personnel from the Editorial Branch to the Special Reports Branch. This can only be done on a very limited scale.

3. Page 14 Paragraph E. Two modifications of the DD(A)'s memorandum dated 12 December 1951 authorizing FBID to employ alien linguists are now required.

a. Defectors should be approved for FBID domestic field employment if properly cleared by I&S, and

b. Prior service with the U. S. Government abroad should be accepted as a substitute for residence in the U. S.

If the Assistant Director for Operations concurs, FBID will prepare a request to the DD(A) for these two modifications.
